Simple Game Engine: Sprite ID Reference

For the Software Design Project (SDP). Use with retro_pack.png and retro_cards.png from retro_images.zip.

How to use this reference

1. Find the picture you want on the pages that follow.
2. The red number above it is its sprite ID. Put that number in your scene matrix.
3. Example:

```
wall_sprite = 555;
world(3,5) = wall_sprite;
drawScene(game_scene,world)
```

4. Changing the matrix does not change the window. Run drawScene again after every change.

Good to know

- Sprites are numbered left to right, then top to bottom, in the order they sit on the sheet.
- retro_pack.png has 32 sprites per row, so ID = (row on sheet - 1) x 32 + column on sheet. In this guide, each sheet row is shown as two lines of 16.
- Sprite 1 in both sheets is transparent ("blank"): whatever is behind it shows through.
- Load the sheet that matches the IDs you chose:

```
game_scene = simpleGameEngine('retro_pack.png',16,16,5,[245,245,245]);
card_scene = simpleGameEngine('retro_cards.png',16,16,8,[0,120,0]);
```

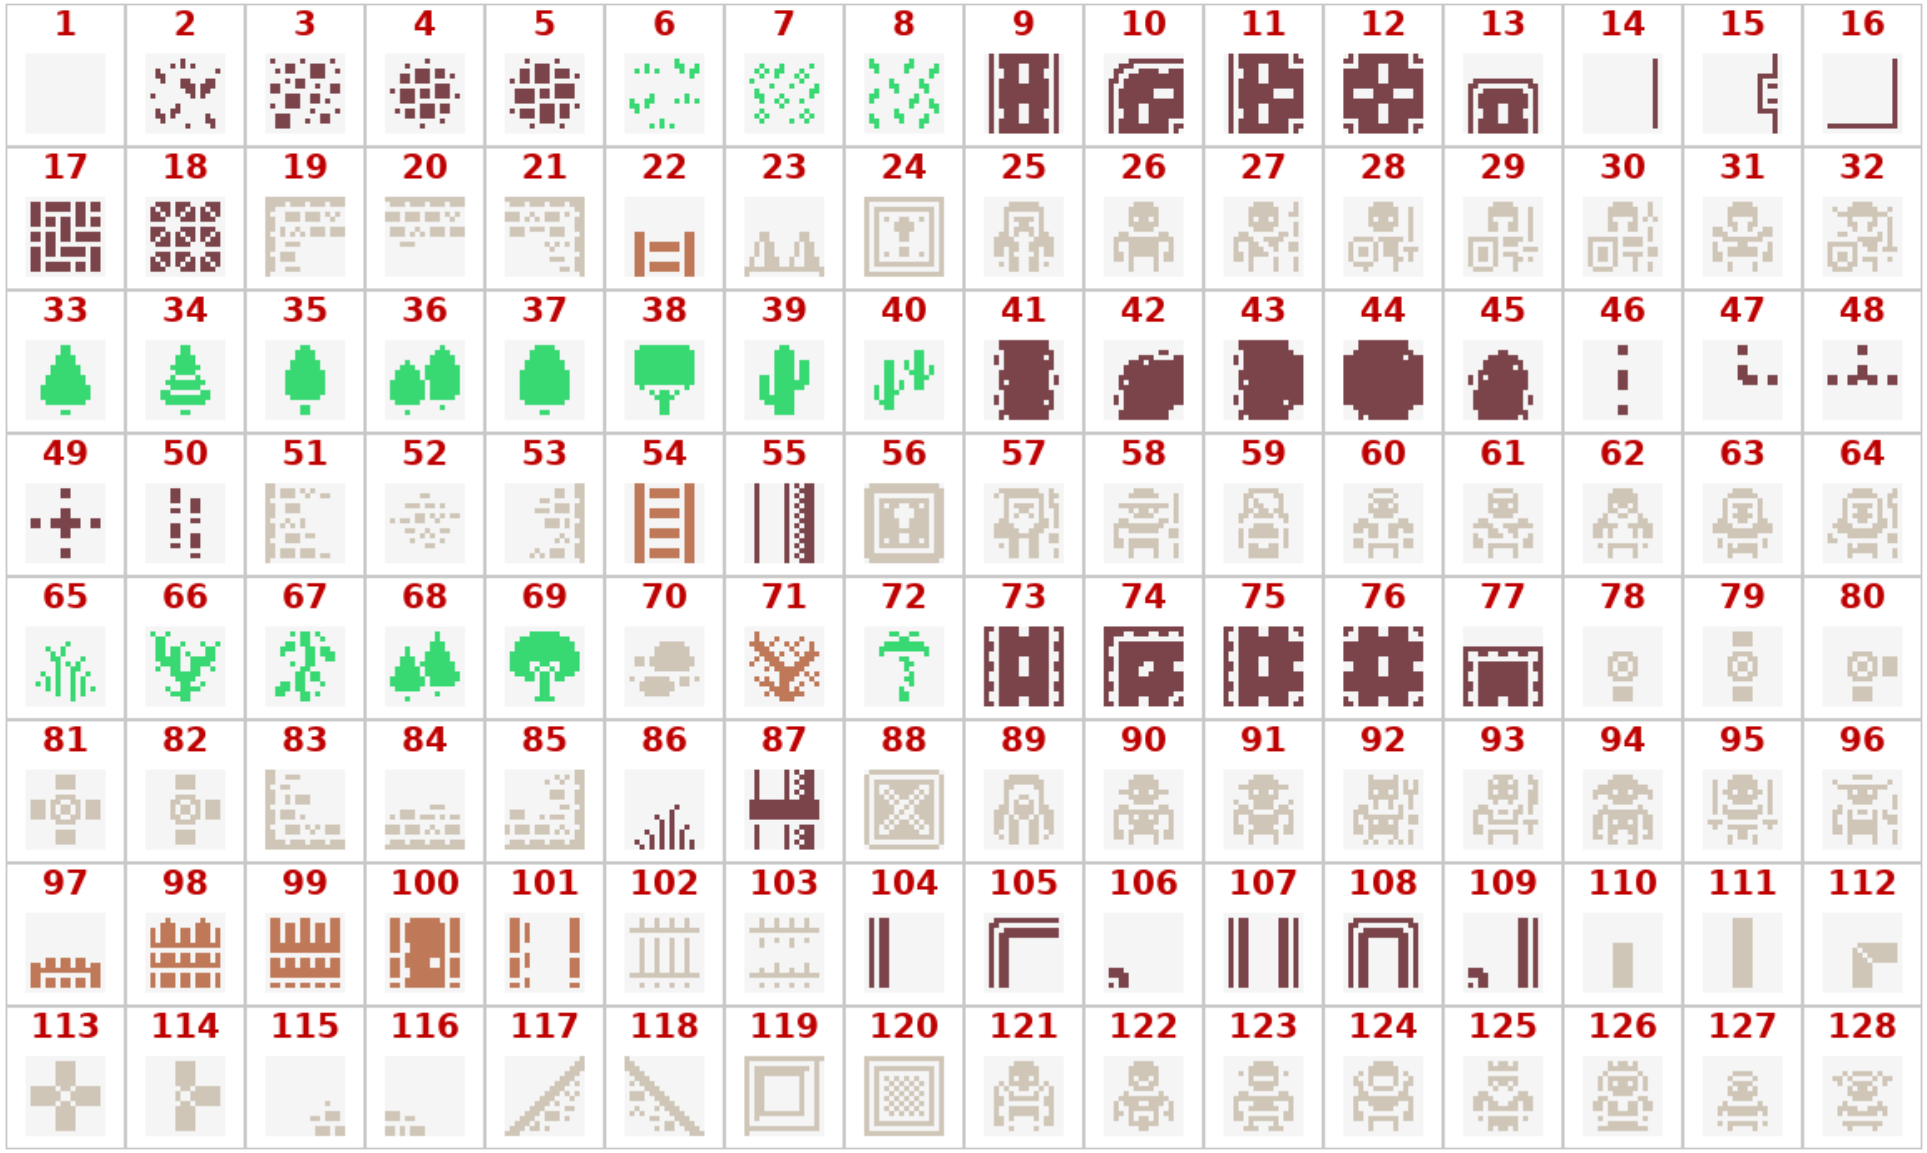

- In retro_cards.png, IDs 75 to 100 are empty slots and draw nothing.
- Pages 2 to 9 show retro_pack.png on light gray; page 10 shows retro_cards.png on green, as in the SDP 02 Live Script.
  The background color does not change any ID.

The ten sprites named in the SDP 02 Live Script

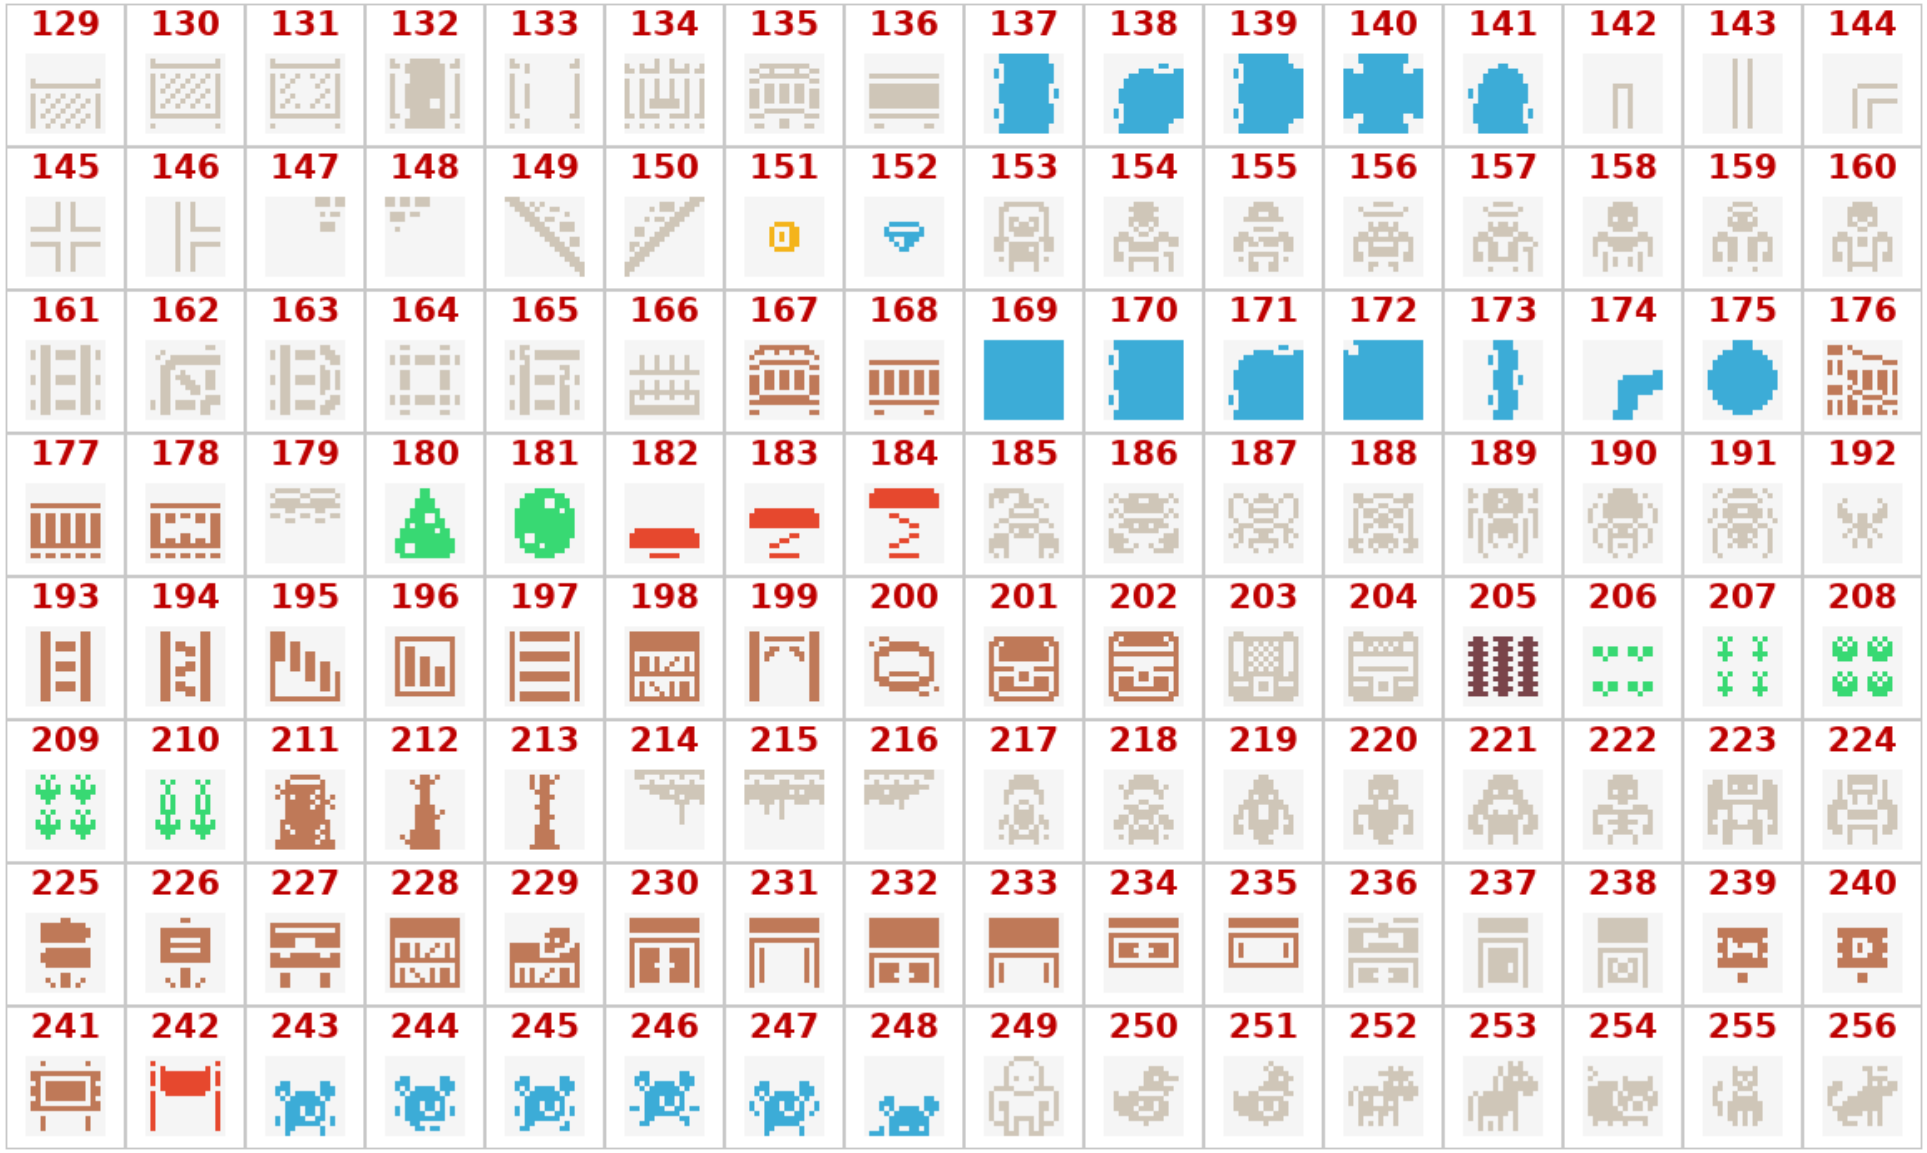

retro_pack.png: IDs 1 to 128

Red number = sprite ID. Each sprite is 16 x 16 pixels, shown enlarged.

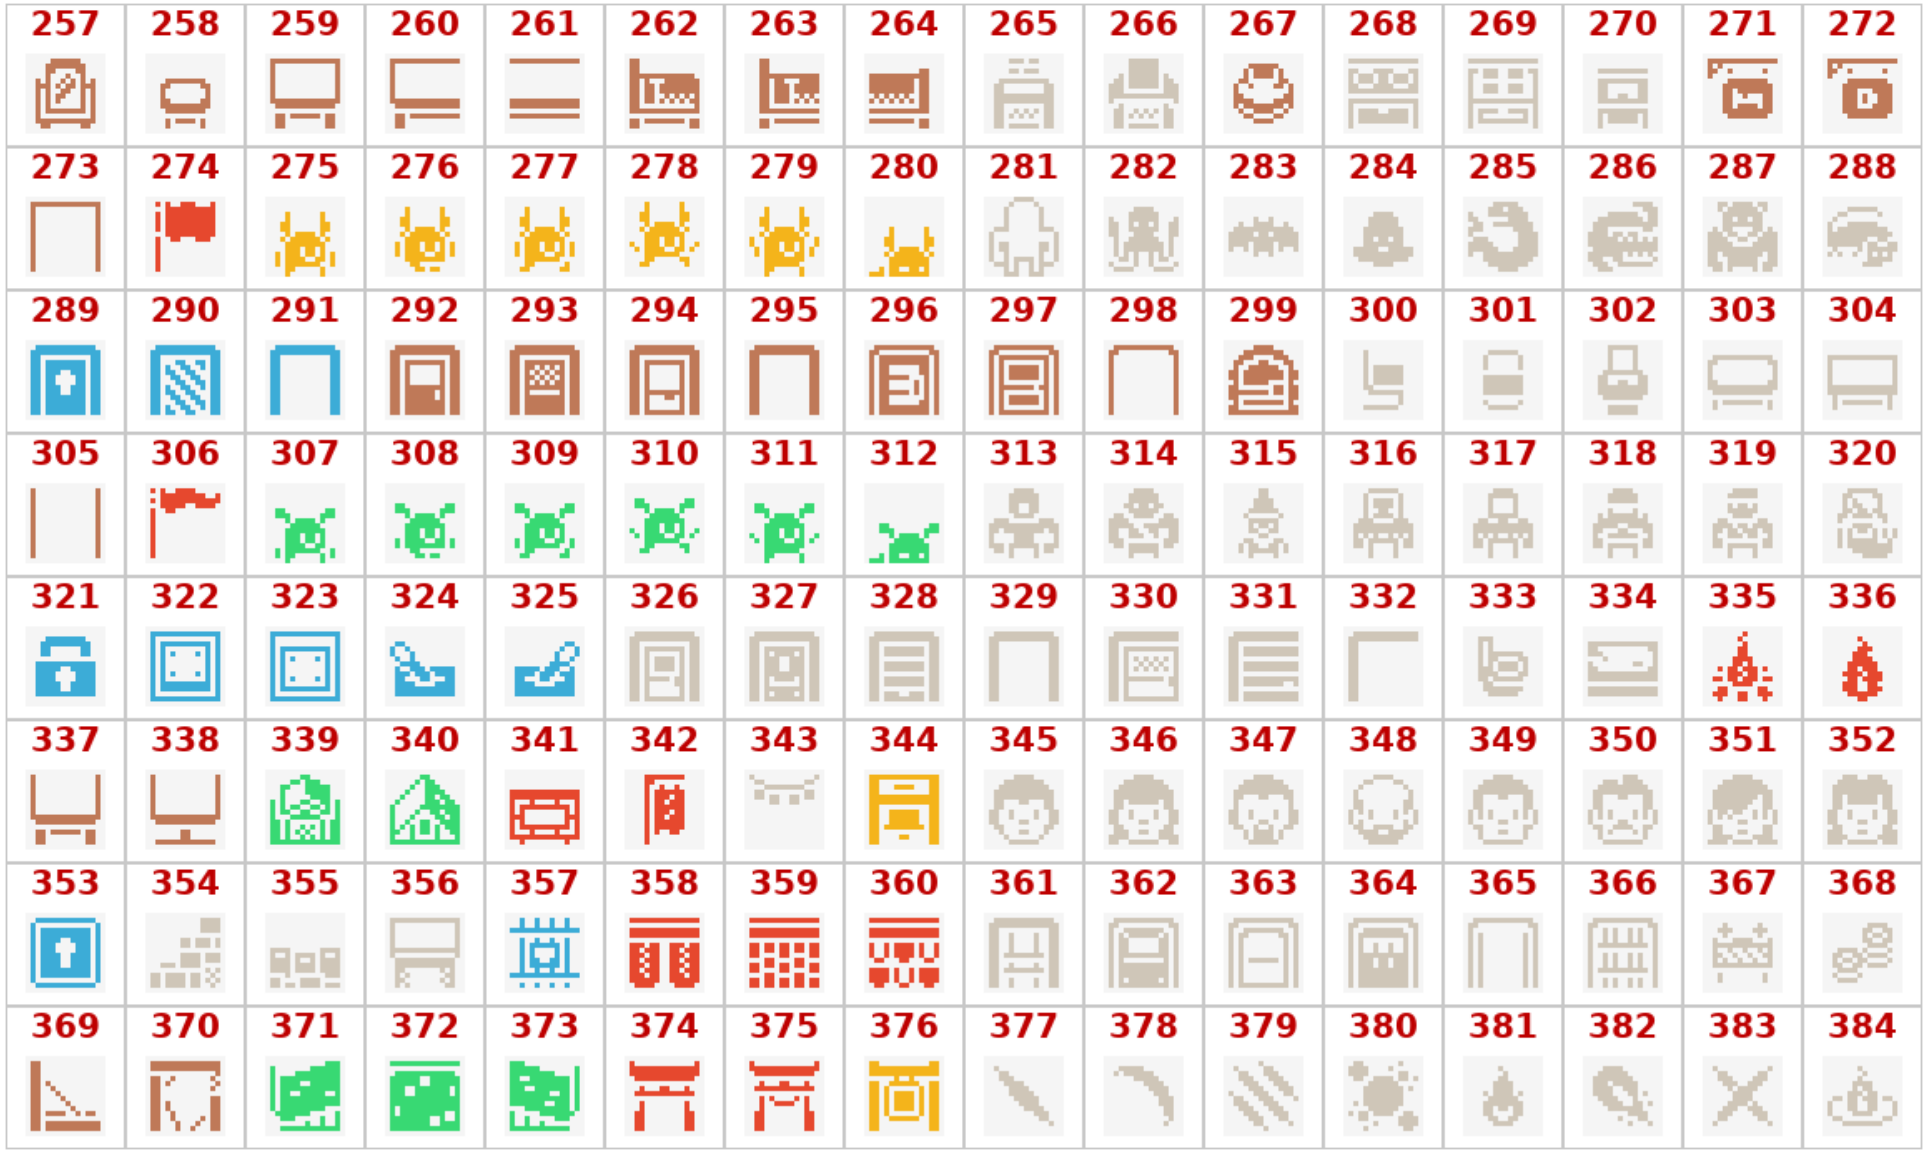

retro_pack.png: IDs 129 to 256

Red number = sprite ID. Each sprite is 16 x 16 pixels, shown enlarged.

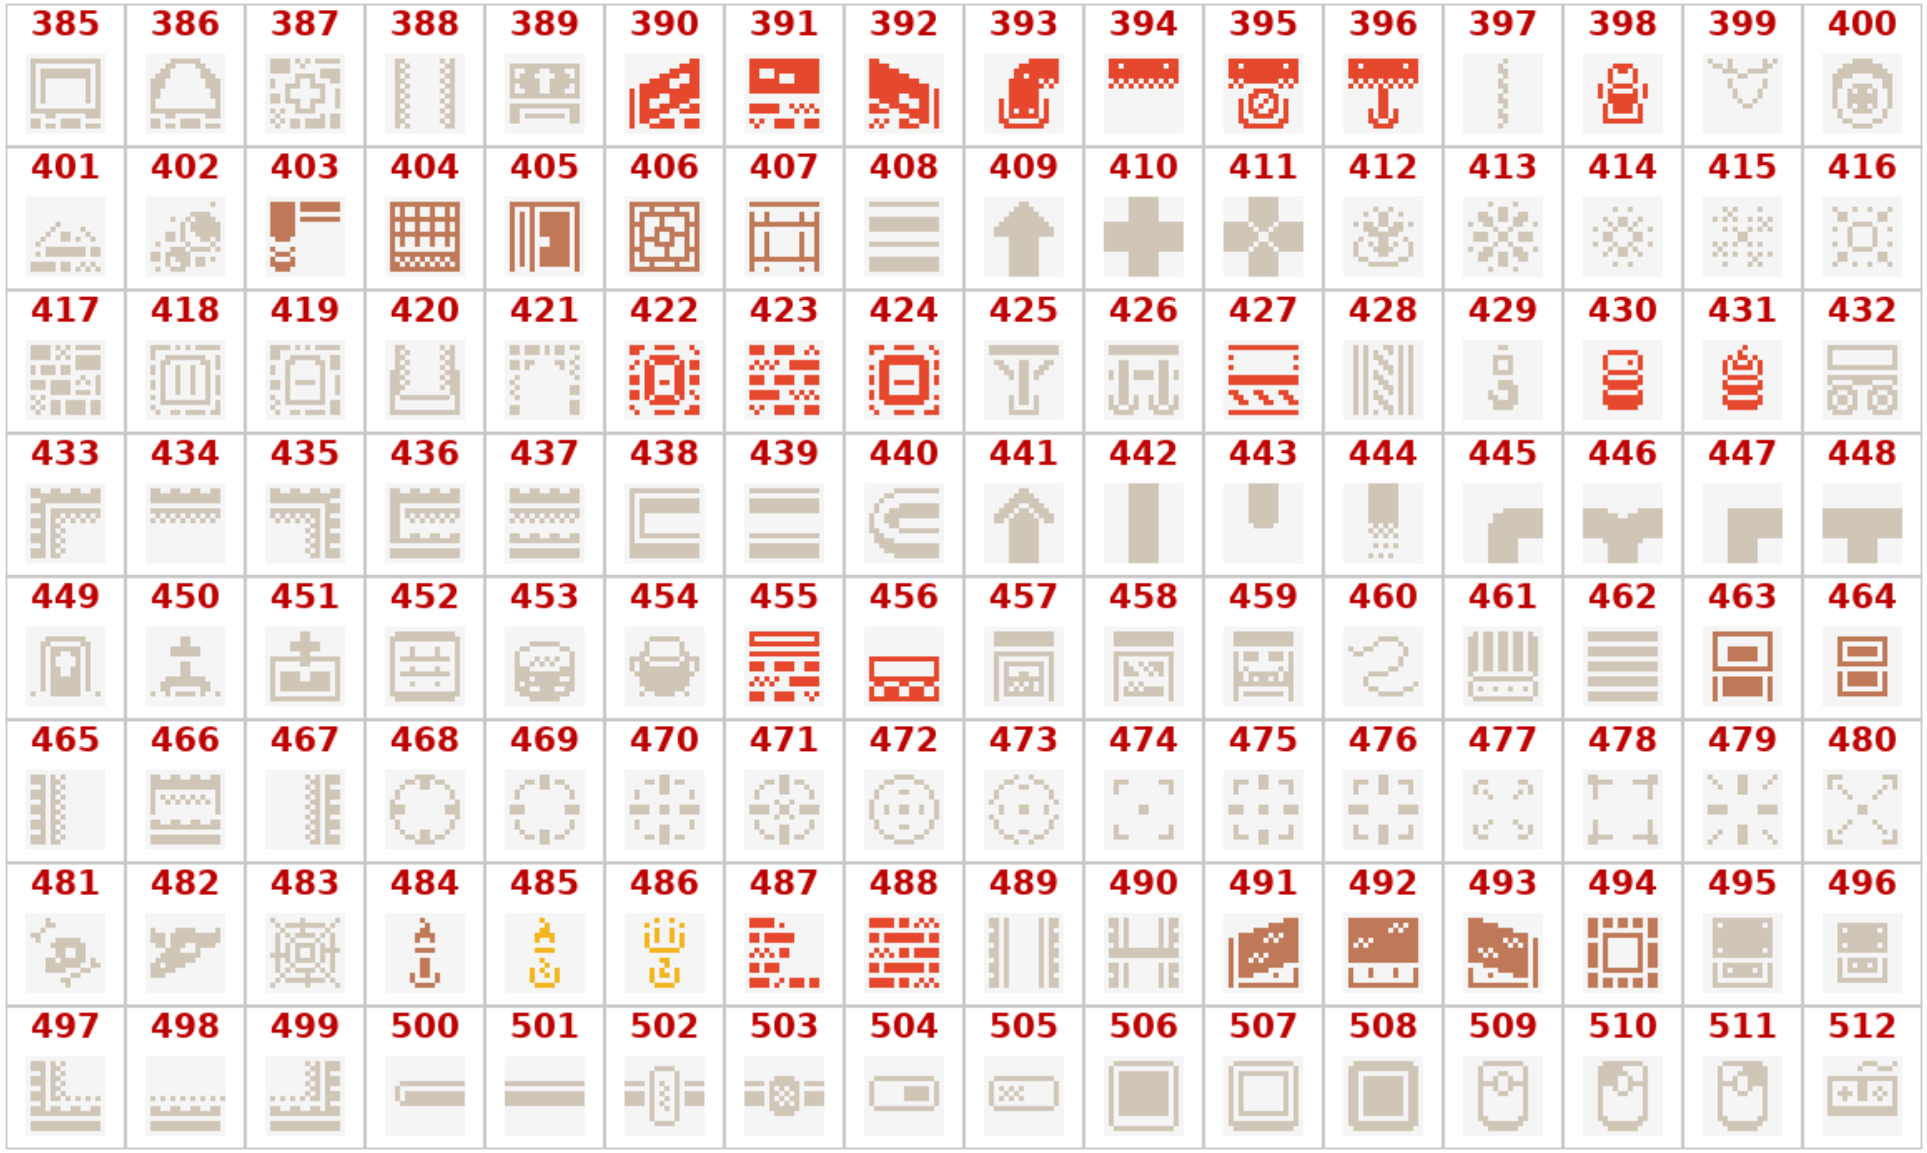

retro_pack.png: IDs 257 to 384

Red number = sprite ID. Each sprite is 16 x 16 pixels, shown enlarged.

retro_pack.png: IDs 385 to 512

Red number = sprite ID. Each sprite is 16 x 16 pixels, shown enlarged.

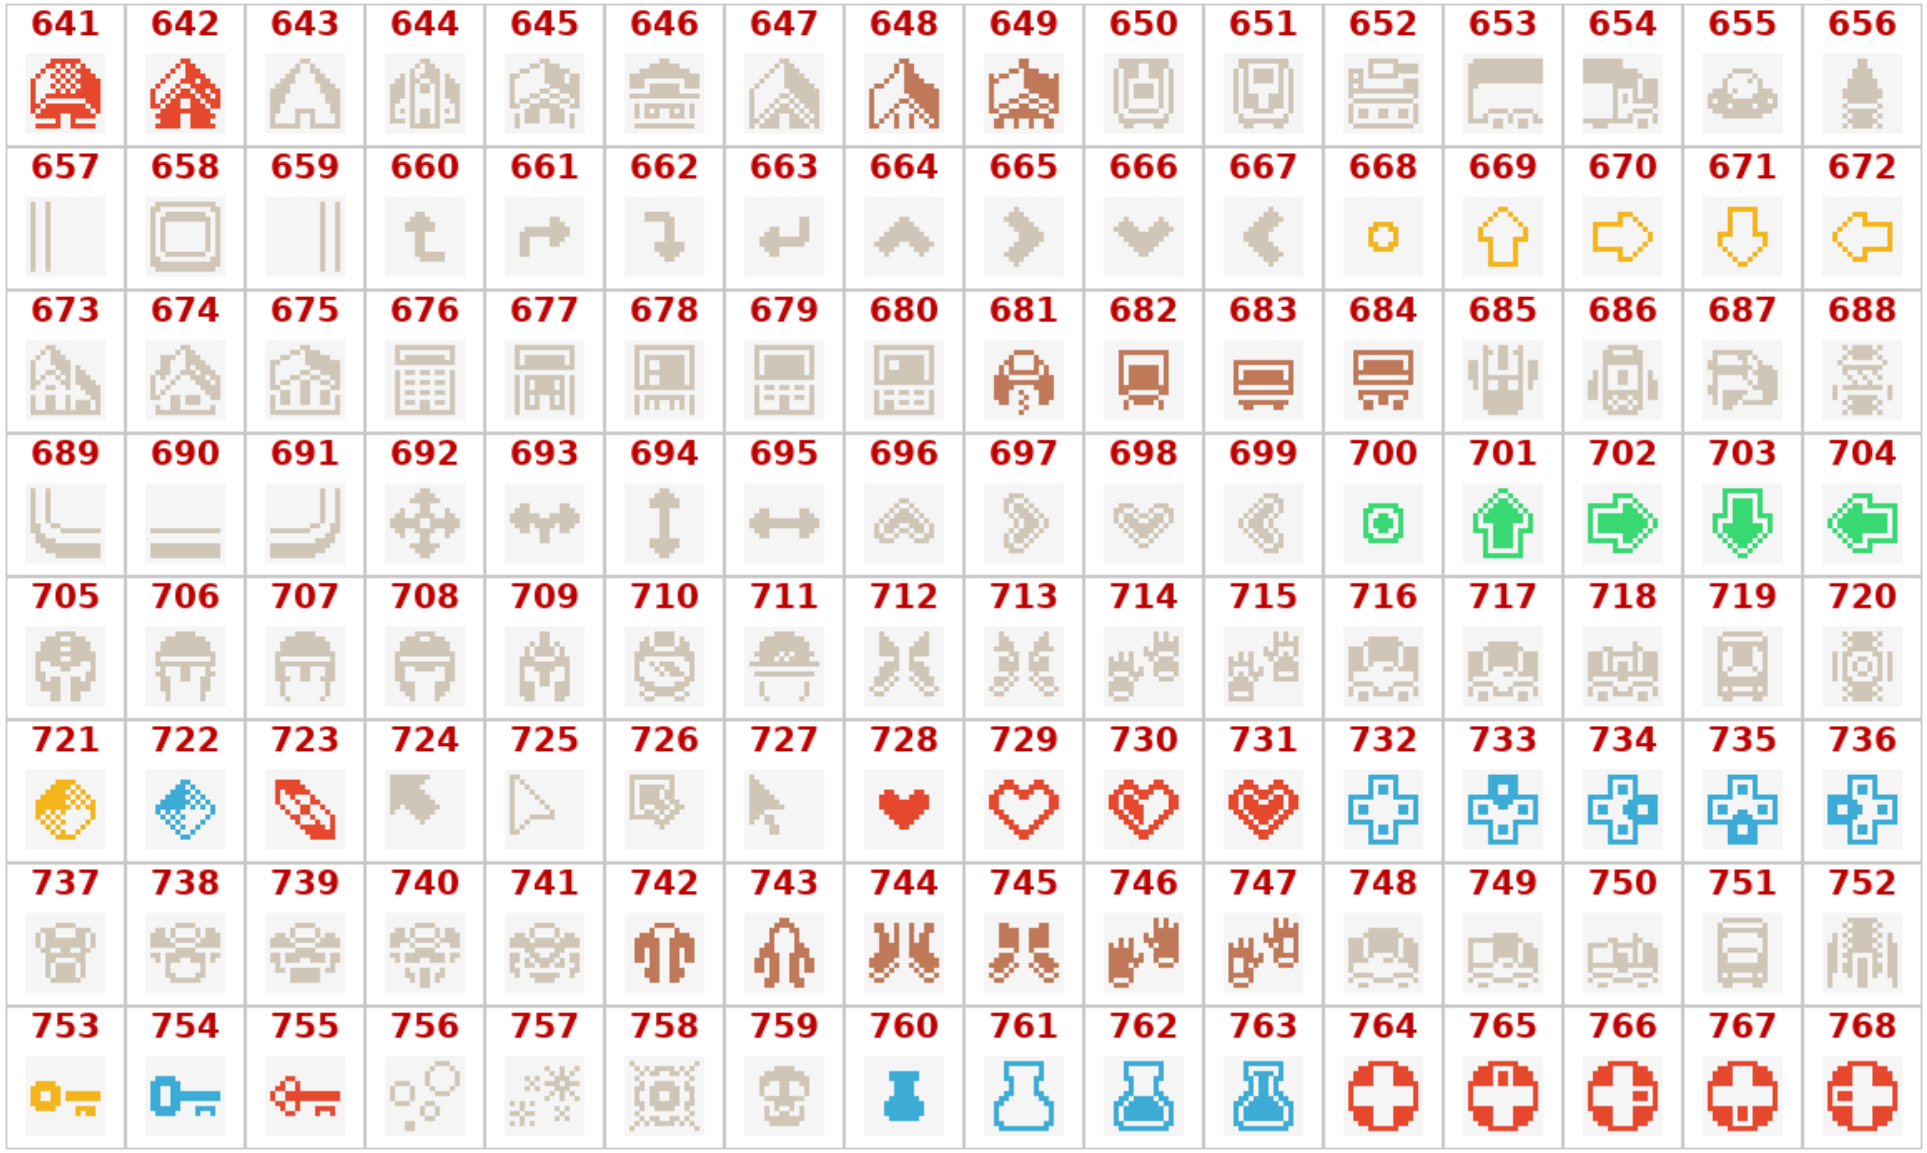

retro_pack.png: IDs 513 to 640

Red number = sprite ID. Each sprite is 16 x 16 pixels, shown enlarged.

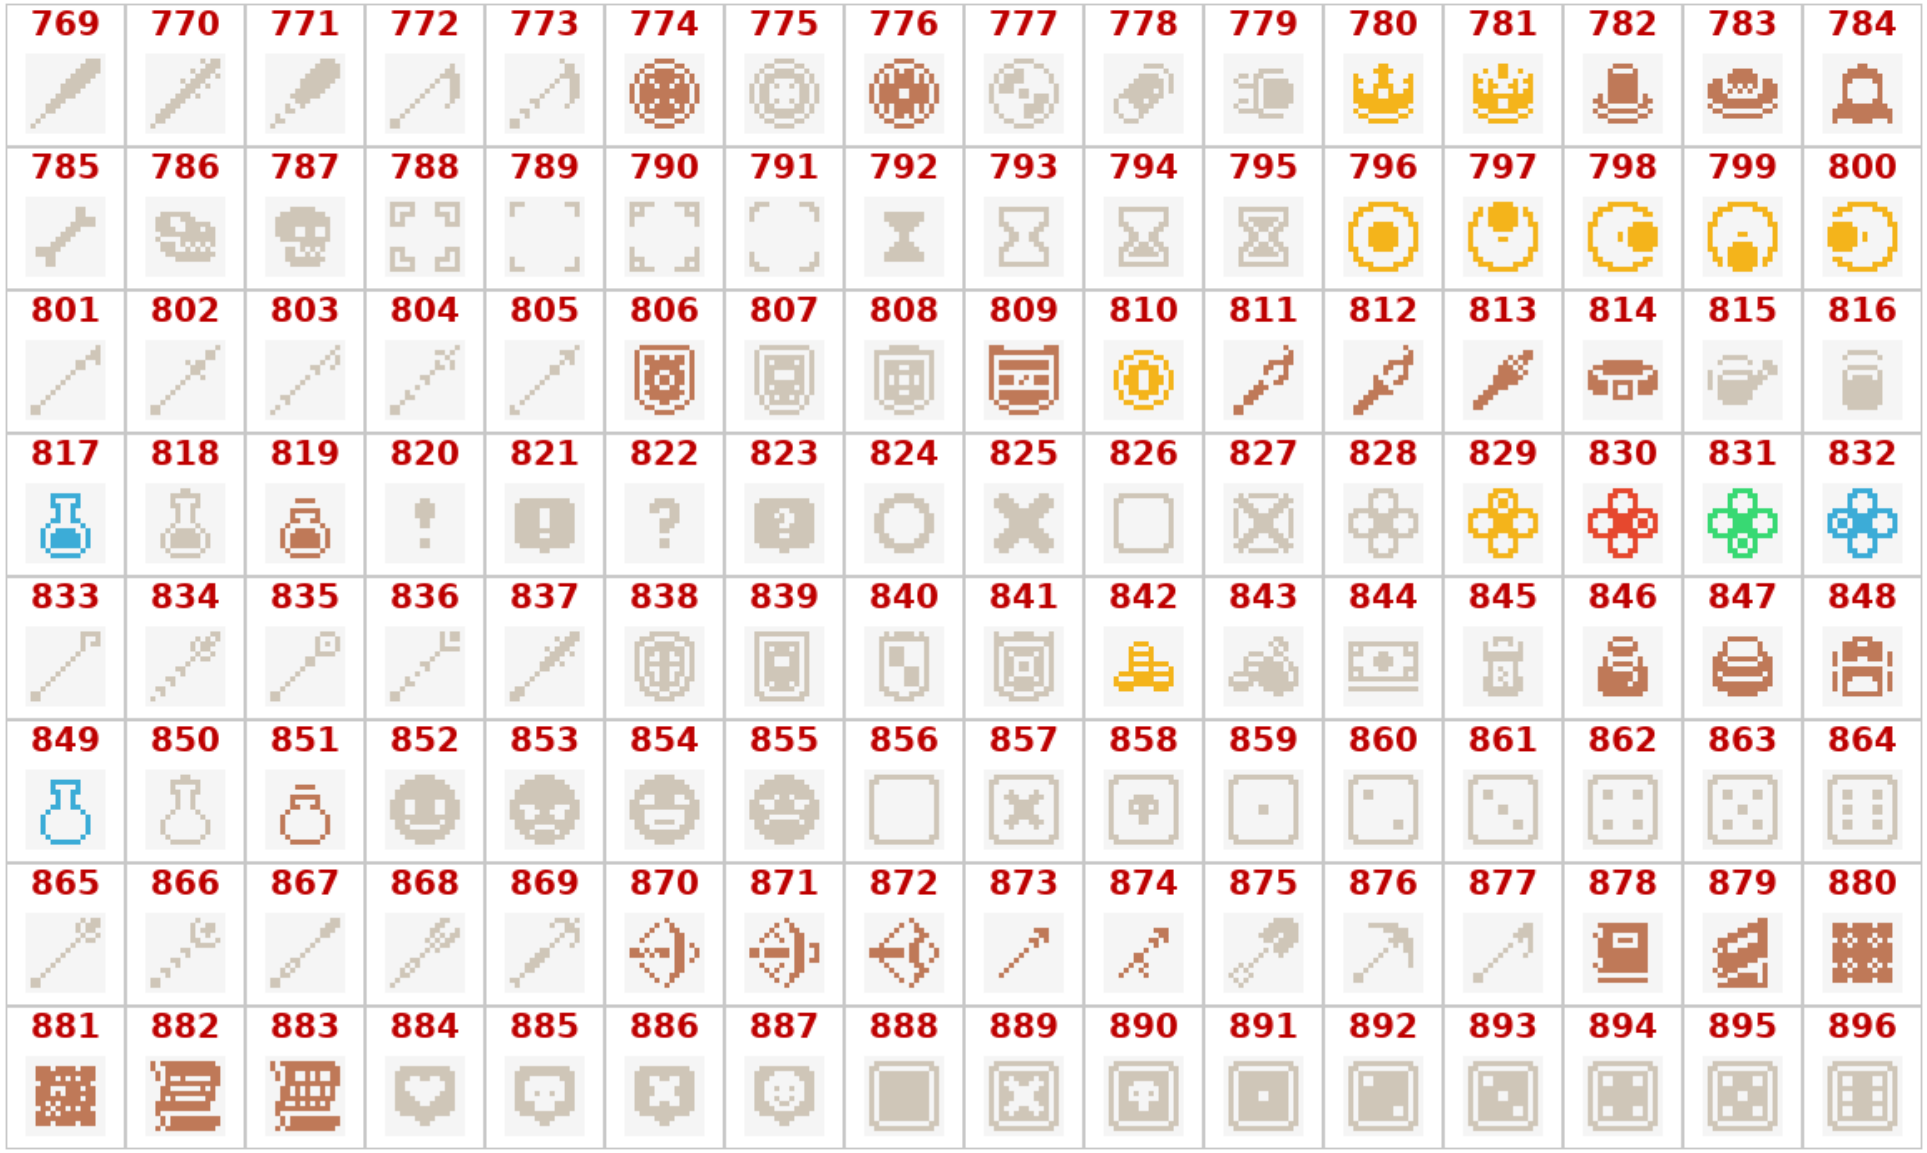

retro_pack.png: IDs 641 to 768

Red number = sprite ID. Each sprite is 16 x 16 pixels, shown enlarged.

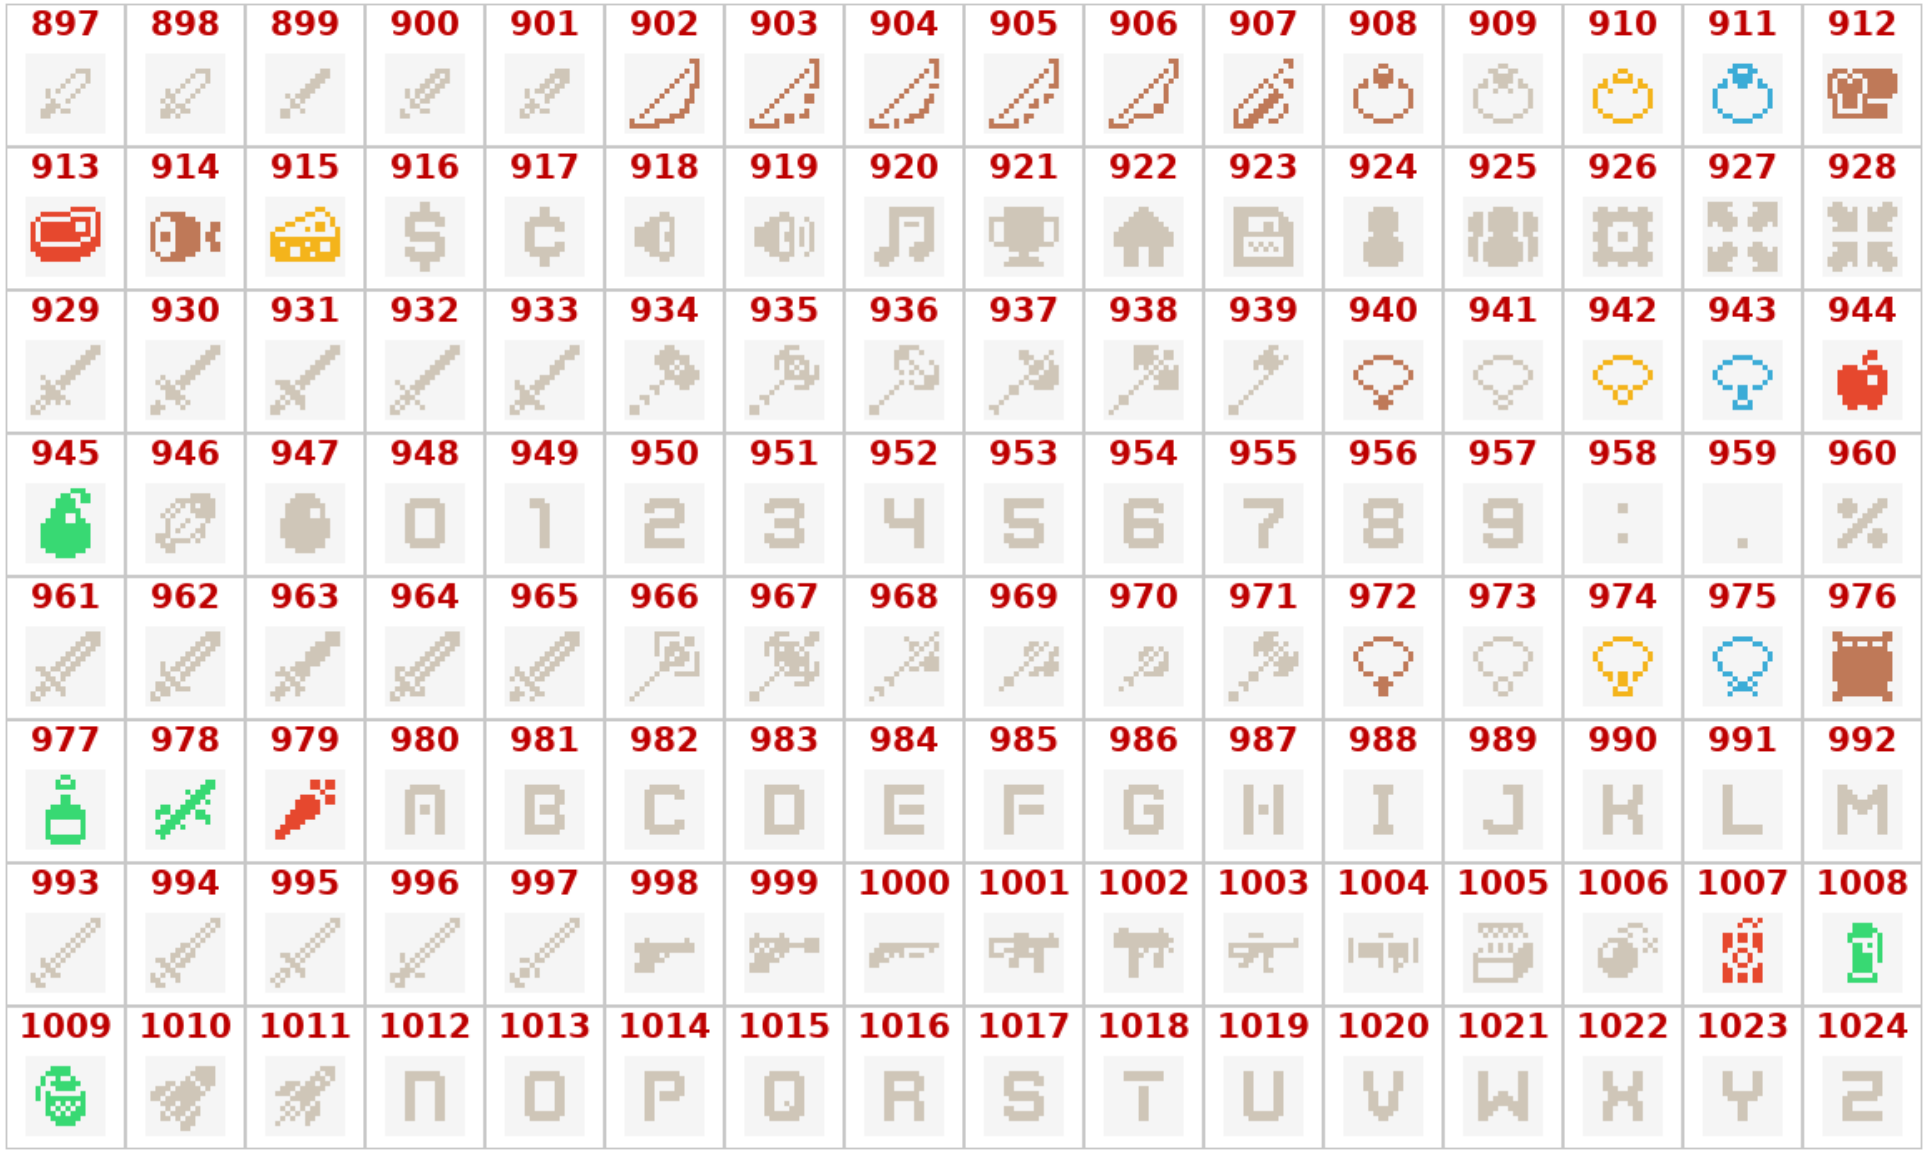

retro_pack.png: IDs 769 to 896

Red number = sprite ID. Each sprite is 16 x 16 pixels, shown enlarged.

retro_pack.png: IDs 897 to 1024

Red number = sprite ID. Each sprite is 16 x 16 pixels, shown enlarged.

retro_cards.png: IDs 1 to 100

Red number = sprite ID. Each sprite is 16 x 16 pixels, shown enlarged.
